Attention: Ms. Augusta Bloom

Dear Ms. Bloom:

As we discussed in our telephone conversation of January 4, 1983, Pfizer's East St. Louis Illinois Plant has the following USEPA hazardous waste treatment /disposal/storage site number:

ILD 006317119PA, T > D

We will soon be shipping 20 to 40 drums of sludge having a pH of 0.5 from our facility to the ILWD hazardous waste treatment facility in Indianapolis, Indiana. This will be the only shipment of this hazardous sludge from our plant. We no longer purchase the material which resulted in the sludge and we will not have any more of this sludge at our facility once this volume has been removed. Please add the statement that we will be a hazardous waste generator for this single occurrence to our USEPA site number.

Thank you for your assistance. Please contact me if you have any questions.

Sincerely,

Jeffrey C. Carlton
Environmental Engineer
